

Syllabus of Zoology
For Master of Science
Under Choice Based Credit System

Academic Session
w.e.f. 2020-2022 onwards

BINOD BIHARI MAHTO KOYALANCHAL UNIVERSITY,
DHANBAD, JHARKHAND

Table of Contents

Sl. No.	Topic/ Title	Page Nos.
1.	List of Members Studies of CBCS P.G. Syllabus	3
2.	Course Structure as per CBCS)	4-6
3.	M.Sc. Semester I	7-15
4.	M.Sc. Semester II	16-26
5.	M.Sc. Semester III	27-36
6.	M.Sc. Semester IV	36-60

**Members of Board of Studies of CBCS Post-Graduate Syllabus as per
Guidelines of the Binod Bihari Mahto Koyalanchal University, Dhanbad**

COURSE STRUCTURE

Semester Wise Examination/Course Structure for Science Faculty

Semester	Paper Code (Credit, Lectures)	Paper Name	Full Marks	End Semester Marks	Mid Semester (Internal) Marks (Written 20 marks) + Day to Day assessment includes extracurricular activities (5 marks) + Attendance (5 marks)
I	ZOO-F-101 (5 Credits, 60 Lectures + 15 Tutorials)	Foundation of Zoology	100	70	30
	ZOO-C-102 (5 Credits, 60 Lectures + 15 Tutorials)	Core Animal Diversity (Non- Chordate & Chordate)	100	70	30
	ZOO-C-103 (5 Credits, 60 Lectures + 15 Tutorials)	Core Endocrinology, Reproductive Biology & Developmental Biology	100	70	30
	ZOO-C/P-104 (5Credits, 75x2 Lectures)	Practical	100	70	30
II	ZOO-S-205 (5 Credits, 60 Lectures + 15 Tutorials)	Skill development Course (SEC) Bioinformatics & Biostatistics	100	70	30
	ZOO-C-206 (5 Credits, 60 Lectures + 15 Tutorials)	System Physiology & Biochemistry	100	70	30
	ZOO-C-207 (5 Credits, 60 Lectures + 15 Tutorials)	Immunology & Microbiology	100	70	30

	ZOO-C/P-208 (5 Credits, 75x2 Lectures)	Practical	100	70	30
III	ZOO-A-309 (5 Credits, 60 Lectures + 15 Tutorials)	Open Elective Medical Zoology Human Disease	100	70	30
	ZOO-C-310 (5 Credits, 60 Lectures + 15 Tutorials)	Cell Biology & genetics	100	70	30
	ZOO-C-311 (5 Credits, 60 Lectures + 15 Tutorials)	Environmental Biology & Toxicology	100	70	30
	ZOO-C/P-312 (5 Credits, 75x2 Lectures)	Practical	100	70	30
IV	ZOO-E-413A/ ZOO-E-413B/ ZOO-E-413C (5 Credits, 60 Lectures + 15 Tutorials)	A. Fish Diversity & Fish Biology B. Molecular Biology C. Insect Diversity and Insect Biology	100	70	30
	ZOO-E-414A/ ZOO-E-414B/ ZOO-E-414C (5 Credits, 60 Lectures + 15 Tutorials)	A. Applied Fish Biology B. Advanced Molecular Biology C. Agricultural Entomology	100	70	30
	ZOO-E/P-415A/ ZOO-E/P-415B/ ZOO-E/P-415C (5 Credits, 75x2 Lectures)	Practical	100	70	30
	ZOO-D-416 (5 Credits, 150 Lectures)	Dissertation/ Project	100	70	30

Attendance (in Percentage)	Marks
Attendance up to 75%	1 Mark
Attendance From 75% - 80%	2 Marks
Attendance From 80% - 85 %	3 Marks
Attendance From 85% - 90%	4 Marks
Attendance More than 90%	5 Marks

Mid Semester/ Internal Assessment Examination Marks

30

The Mid Semester/ Internal Assessment Examination shall have three Components

- a) Two Semester Internal Assessment test (SIA) of 20 Marks each
- b) Class Attendance Score of 5 Marks
- c) Day to day and extracurricular activities of 5 Marks

Best of two applicable for computation of marks for SIA

Semester Internal Assessment Test

Written examination – 20 Marks

- ❖ In all six questions are to be set in Two Groups A & B and four questions are to be answered.
- ❖ Group A: Q No. 1 will be compulsory which will include MCQ type carrying one mark each (1x5=5).
- ❖ Group B: Rest five questions will be descriptive answer type are to be set and examinees are required to answer any three, each carrying Five marks (5x3=15).

**SEMESTER – I,
COMPULSORY FOUNDATION COURSE
(Credit – 05, Lectures – 60, Tutorials - 15)**

PAPER – ZOO – F – 101	Foundation of Zoology	F.M=100 (End Sem = 70 + Mid Sem = 30)
----------------------------------	------------------------------	--------------------------------------------------

- ❖ **In all nine questions are to be set of equal values and five questions are to be answered of which Question No. 1 will be compulsory.**
- ❖ **Questions will be grouped into two Groups A and B.**
- ❖ **Group A will be comprised of question no. 1 which will consist of two parts I & II. Part I will be MCQ type covering the entire syllabus and carry one mark each (1x6=6). Part II will comprise short answer type questions. Each carries 4 marks (2x4=8). There will be no option in question no. 1**
- ❖ **Rest of eight questions will be descriptive type, set from the whole syllabus in group B. Examinees are required to answer any four from this group, each carrying 14 marks.**
- ❖ **The question No. 9 will be short notes type, each carrying seven marks (7x2=14) in which only 2 should be answered out of four options.**

S. No.	Topic	Contact Hour
GROUP - A		
1	Animal Systematics and Histochemical Techniques 1.1. Importance and application of biosystematics in biology. 1.2. Chemotaxonomy, Cytotaxonomy, Molecular taxonomy 1.3. Species and Species concept. 1.4. Synthetic theory of Evolution	08
2	Fundamentals of Histochemistry 2.1 Histochemistry: Types of Histochemical stains and their principle 2.2 General protein localization by Mercury Bromophenol Blue 2.3 Proteins with – NH ₂ groups by Ninhydrin-Schiff reaction 2.4 General lipids by Sudan Black B method 2.5 DNA by Feulgen reaction 2.6 DNA and RNA by Methyl green-pyronin	10
3	. Histotechniques: 3.1 Fixation and tissue processing: 3.2 Types of Fixative 3.2.1 Fixative 3.2.2 Dehydration 3.2.3 Clearing 3.2.4 Embedding 3.3 Microtomy 3.4. Staining of Paraffin section 3.4.1. Principle and method of staining 3.4.2. Histological stains	08

GROUP _ B		
4	General Principle and applications of 4.1. Spectrophotometry: Visible, UV visible 4.2. Centrifuge: its types and uses in biology.	06
5	Separation technique: 5.1. Electrophoresis: Principles and application 5.2. Type: Native, SDS PAGE and Agarose gel electrophoresis.	03
6	Immunological techniques: Principle of ELISA and its types	03
7	Microscopy, principle & applications 7.1. Fluorescence microscope 7.2. Electron microscope 7.2.1. TEM 7.2.2. SEM	06
8	Molecular biology techniques 8.1 Southern blotting 8.2. Northern blotting 8.3. Western blotting 8.4 DNA Sequencing	04
9	Autoradiography: 9.1. Radioactive isotopes 9.2. Method and application of autoradiography	03
10	Polymerase chain reaction (PCR)	03

Recommended

1. A Text Book of Histology, William Bloom and Don W Fawcett, Saunders
2. Bancroft, J.D. & Stevens, A. Theory and Practice of Histological techniques, Churchill- Livingstone, 2002
3. Casselman, W.G.B.: Histochemical techniques, John Wiley, 1959
4. Pearse, A.G.E.: Histochemistry; Theoretical and Applied (Vol. I, II & III), (4th ed.), Churchill-Livingstones, 1980-1993
5. Staining methods Histologic and Histochemical, J F A McMannus and Rubert W Mowry, Harper and Row 1964

**SEMESTER – I,
Animal Diversity (Non- Chordate & Chordate)**

(Credit – 05, Lectures – 60, Tutorials - 15)

PAPER – ZOO – C – 102	Animal Diversity (Non- Chordate & Chordate)	F.M=100 (Extn.70 + Int.30)
------------------------------	------------------------------------------------------------	-----------------------------------

<ul style="list-style-type: none"> ❖ In all nine questions are to be set of equal values and five questions are to be answered of which Question No. 1 will be compulsory. ❖ Questions will be grouped into two Groups A & Group B. ❖ Group A will be comprised of question no. 1 which will consist of two parts A & B. Part A will be MCQ type covering the entire syllabus and carry one mark each (1x6=6). Part B will comprise short answer type questions. Each carries 4 marks (2x4=8). There will be no option in question no. 1 ❖ Rest of eight questions will be descriptive type, set from the whole syllabus in group B. Examinees are required to answer any four from this group, each carrying 14 marks. ❖ The question No. 9 will be short notes type, each carrying seven marks (7x2=14) in which only 2 should be answered out of four options.

S. No.	Topic	Contact Hour
GROUP - A		
1	Origin of metazoan	03
2	Origin of Coelom-Acoela, Pseudocoela, Schizocoela and Enterocoela	03
3	Locomotion 3.1 Modern concept of Flagellar and Ciliary movement in protozoa 3.2 Foot and its modification in Mollusca 3.3. Hydrostatic movements in Echinodermata	06
4	Nutrition and Digestion: Filter feeding in Polychaeta.	02
5	Respiration 5.1 Respiratory pigments. 5.2 Respiration in Arthropoda 5.2.1 Branchial/Gill respiration 5.2.2 Respiration by Book lungs 5.2.3 Tracheal respiration 5.3 Respiration in Mollusca 5.3.1 Aquatic respiration 5.3.2 Aerial respiration	10
6	Excretion in invertebrates: Excretion and osmoregulation in annelids.	02
7	Invertebrate larval forms and their evolutionary significance 7.1 Larval forms of Trematoda and Cestoda 7.2 Larval forms of Echinodermata	04

8	Miscellaneous topics: 8.1 Structural peculiarities and affinities of Onychophora 8.2 Adaptive radiation in Polychaetes 8.3 Ancestral mollusc and derivation of different modern classes	06
---	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	----

GROUP - B		
9	Origin of the following: 9.1 Birds 9.2 Mammals	04
10	Skull in Reptiles	02
11	Rhynchocephalia	02
12	Dinosaurs and their causes of extinction	02
13	Modification of palate in birds	03
14	Aerodynamics and energetic of flying and gliding in birds	03
15	Dentition in mammals	03
16	Primitive mammals: 17.1 Prototheria 17.2 Metatheria	02
17	Aquatic mammals.	03

- ❖ The question No. 9 will be short notes type, each carrying seven marks (7x2=14) in which only 2 should be answered out of four options.

S. No.	Topic	Contact Hour
GROUP - A		
1	Hormones 1.1. Biosynthesis of hormones 1.1.1. Amino acid derived hormones (T ₃ , T ₄) 1.1.2. Steroid hormones: Mineralocorticoids, glucocorticoids & Sex hormones. 1.2. Hormone Action 1.2.1. Types of receptors, second messenger, cytosolic receptors and their action	03
2	Neuroendocrines and neurohormones	03
3	Pineal in vertebrates: Its structure, hormones, and their function	06
4	Structure and function of Parathyroid	02
5	Hormonal control of 5.1. Fuel metabolism: Insulin, Glucagon, and Epinephrine 5.2. Hormonal regulation of Osmoregulation 5.3. Hormonal control of calcium regulation	10

6	Histophysiology of mammalian gonads 6.1. Histophysiology of testes 6.2. Histophysiology of ovary	02
7	Semen formation and composition	04
8	Pregnancy 8.1. Hormonal regulation of implantation and pregnancy 8.2. Placental hormones 8.3. Parturition 8.3.1. Stages of Parturition 8.3.2. Hormonal interplay	06
9	Lactation 9.1. Structure and functions of mammary gland 9.2. Role of various hormones in lactation	02

GROUP - B

GROUP - B		
10	Fertilization 10.1. Molecular events of fertilization 10.2. Prevention of polyspermy	04
11	Laying down of embryonic body plan 11.1. Organizer concept 11.2. Cell lineage in <i>Coenorhabditis elegans</i>	05
12	Cell differentiation 12.1. Myogenesis of skeletal muscle 12.1.1. Formation 12.1.2. Regeneration 12.1.3. Hypertrophy 12.2. Haemopoietic stem cells and their diversification 12.3. Haemoglobin biosynthesis	04
13	Genes controlling embryogenesis 13.1. Determination of anterior and posterior axes of <i>Drosophila</i> 13.2. Determination of dorso-ventral axis in <i>Drosophila</i> 13.3. Homoeotic genes in <i>Drosophila</i> 13.4. Homoeobox genes in mammals	05

SEMESTER – I,
Practical based on ZOO C 101,102 and 103
(Credit – 05, Lectures – 60, Tutorials - 15)

PAPER – ZOO – C/P – 104	PRACTICAL	F.M=100 (Extn.70 + Int.30)
--------------------------------	------------------	-----------------------------------

Practical	Marks distribution
1. Dissection:	6X2=12
1.1. Vertebrate	06
1.2. Invertebrate	06
2. Slide preparation	04
3. Spotting	2X10=20
3.1. Slides (04), (02 Invertebrate, 02 Vertebrate)	2X4=08
3.2. Museum Specimens (04)	2X4=08
[(02) Invertebrate, (02) Vertebrate]	
3.3. Bones (02)	2X2=04
4. Reproductive Physiology & Endocrinology	5×2=10
4.1. Reproductive physiology	05
4.2. Endocrinology	05
5. Population genetics/ biosystematics	04
6. Class record, poster/models/collection	10
7. viva-voce	10
TOTAL	70

List of Practical

1. Dissection:

1.-Local bony fish- Afferent, Efferent and cranial nervous system

2’- Prawn-Nervous system and appendages of Prawn

3. Earthworm –Nerve ring, Reproductive system and digestive system

2. Slide preparation- Gemmule of sponge, Obelia colony, Statocyst of prawn, ovary of earthworm, Daphnia, placoid and cycloid scale .

3. Museum Specimens- *Euspongia*, *Physalia*, *Metridium*, *Taenia*, *Ascaries*, *Nereis*, *Aphrodite*, *Limulus*, *Octopus*, *Ioligo*, *sepia*, *Echinus*, *Asterias*, *Holothuria*, *Exocoetus*, *Hyla*, *Racophorous*, *Draco*, *Phrynosoma*, *Bat*

4. Permanent Slides: Invertebrate & Vertebrate (General histology, reproductive organs and endocrine glands)

5. Bones: Fish & Mammals, Different types of Teeth of mammals

6. Bio-Systematic and Population genetics

1. Preparation of Taxonomic Key
2. Specimens/models showing convergent and divergent evolution Connecting link, living fossil, serial homology.
3. Estimation of gene and genotype frequency in human population.

SEMESTER – II

(Credit – 05, Lectures – 60, Tutorials - 15)

PAPER – ZOO – S – 205	Bioinformatics & Biostatistics	F.M=100 (Extn.70 + Int.30)
------------------------------	-------------------------------------------	-----------------------------------

<ul style="list-style-type: none"> ❖ In all nine questions are to be set of equal values and five questions are to be answered of which Question No. 1 will be compulsory. ❖ Questions will be grouped into two Groups A & Group B. ❖ Group A will comprise question no. 1 which will consist of two parts A & B. Part A will be MCQ type covering the entire syllabus and carry one mark each (1x6=6). Part B will comprise short answer type questions. Each carries 4 marks (2x4=8) . There will be no option in question no. 1 ❖ Rest of eight questions will be descriptive type, set from the whole syllabus in group B. Examinees are required to answer any four from this group, each carrying 14 marks. ❖ The question No. 9 will be short notes type, each carrying seven marks (7x2=14) in which only 2 should be answered out of four options.

S. No.	Topic	Contact Hour
GROUP - A		
1	Introduction to computational biology & bioinformatics. Branches of bioinformatics.	03
2	Nature of biological data. Biological data formats. Concepts of digital library.	03
3	Bioinformatics databases: 3.1 Literature databases (PubMed), 3.2 Primary nucleotide sequence databases (NCBI, EMBL, DDBJ), 3.3 Protein sequence databases (SwissProt, PIR), 3.4 Sequence motif databases (Pfam, PROSITE), 3.5 Structure databases (PDB, SCOP, CATH).	06
4	Algorithms and bio-tools: 4.1 Sequence alignment and database similarity searching. 4.2 Scoring matrix, BLAST series, PSI- BLAST, FASTA. 4.3 Global Alignments – Needleman Wunsch Algorithm,	02

	4.4 Local Alignments – Smith Waterman Algorithm. 4.5 Multiple sequence alignments (ClustalW).	
5	Basic concepts on phylogenetic markers and molecular phylogeny.	10
6	Structural bioinformatics: prediction of secondary & tertiary structure of proteins.	02
7	Human genome projects.	04
8	Other biological tools and resources: EMBOSS, Expasy, OMIM, etc.	06
9	Introduction of Nanotechnology, 9.1 Role of bioinformatics in nanotechnology. 9.2 Current progress in biomedical nanotechnology with bioinformatics.	05

GROUP - B		
10	Statistics of location and dispersion Measures of central value- Mean, Median, Mode. Measures of dispersion- standard deviation, coefficient of variation. Skewness and Kurtosis.	04
11	Sampling statistics and testing of hypothesis. Procedure for testing hypothesis.	02
12	Test of significance based on small samples and large samples ('t' test and 'z' test), Chi-square test	02
13	Analysis of variance- One-way and Two-way ANOVA.	04
14	Correlation: 14.1. Definition types of correlation 14.2 Methods of studying correlation 14.3. Karl Pearson coefficient of correlation 14.4. Rank correlation method.	04
15	. Regression analysis: 15.1 Regression lines 15.2. Regression equations.	02

Suggested readings/Text Book (s):

SEMESTER – II
Based on 205,206 & 207

(Credit – 05, Lectures – 60, Tutorials - 15)

PAPER – ZOO – S – 208	PRACTICAL	F.M=100 (Extn.70 + Int.30)
------------------------------	------------------	-----------------------------------

Practicals	Marks Distribution
1. Physiology & Biochemistry	
1.1. Physiological Experiment	10
1.2. Biochemistry	10
2. Tools & Techniques	
2.1. Apparatus (one)	05
2.2. Technique (One)	05
3. Immunology	10
4. Microbiology	10
5. Class Record, chart,/models	10
6. Viva-voce	10
Total Marks-70	

List of Practicals

1. Physiology Experiment:
 - 1.1. Determination of blood pressure by sphygmomanometer.
 - 1.2. Demonstration of diffusion process/osmosis across a membrane
 - 1.3. Determination of clotting and bleeding time
 - 1.4. Haemin Crystal preparation
 - 1.5. Estimation of Hb concentration.

2. Biochemistry:

- 2.1. Construction of models of bio molecules by wire and beads.
- 2.2. Detection of presence of blood glucose by Benzedrine test
- 2.3. Quantitative estimation of glucose, urea and Protein in the unknown

sample

3. Study of laboratory apparatus:-

- 3.1 Autoclave
- 3.2. Microtome
- 3.3. pH meter
- 3.4. Centrifuge
- 3.5. Colorimeter
- 3.6. Spectrophotometer

4. Techniques :

4.1. Microtomy-

4.1.1. Fixation

4.1.2. Block preparation:

4.1.3. Section cutting

4.1.4. Spreading and

4.1.5. Staining of tissues section.

4.2. Histochemical demonstration:

4.2.1. Sudan black for lipid

4.2.2. PAS for carbohydrate

4.2.3. Bromophenol blue for protein

4.3. Paper chromatography

5. Microbiology:

5.1. Sterilisation technique

5.2. Media preparation for microbial culture

5.3. Gram staining of bacteria

6. Immunology:

6.1. Antibody sensitivity test

6.2. Study of Immune cells in a blood film.

6.3. Demonstration of agglutination reaction by blood grouping.

6.4. Mancini's radial Immunodiffusion test

6.5. Ouchterlony double Immunodiffusion test

SEMESTER – III
Open Elective
(Credit – 05, Lectures – 60, Tutorials - 15)

PAPER – ZOO – A – 309	Medical Zoology: Human Diseases	F.M=100 (Extn.70 + Int.30)
------------------------------	----------------------------------------	-----------------------------------

- ❖ In all nine questions are to be set of equal values and five questions are to be answered of which Question No. 1 will be compulsory.
- ❖ Questions will be grouped into two Groups A & Group B.
- ❖ Group A will comprise question no. 1 which will consist of two parts A & B. Part A will be MCQ type covering the entire syllabus and carry one mark each (1x6=6). Part B will comprise short answer type questions. Each carries 4 marks (2x4=8). There will be no option in question no. 1
- ❖ Rest of eight questions will be descriptive type, set from the whole syllabus in group B. Examinees are required to answer any four from this group, each carrying 14 marks.
- ❖ The question No. 9 will be short notes type, each carrying seven marks (7x2=14) in which only 2 should be answered out of four options.

S. No.	Topic	Contact Hour
GROUP - A		
1	Basic concept of parasite, host, mode of infection, Host-parasite relationship and prophylaxis 1.1. Protozoan diseases: 1.1.1 <i>Entamoeba histolytica</i> – causative pathogen for diarrhoea, dysentery and liver abscess in human 1.1.2. <i>Leishmania donovani</i> – causative pathogen for Kala-azar 1.1.3. <i>Plasmodium vivax</i> – Malaria- with special reference: Life Cycle, Pathogenicity, prophylaxis and Treatment	20
2	Helminthes (worm) Diseases: 2.1 <i>Ascaris lumbricoides</i> – causative pathogen for Ascariasis 2.2 <i>Taenia solium</i> and <i>T saginata</i> - with special reference: Life Cycle, Pathogenicity, Prophylaxis and Treatment	15
3	Arthropods as Vector of Human Disease 3.1 Mode of Transmission of Disease by Arthropod vector	15

	<p>3.2 Comparative Bionomic & Disease Transmitted By</p> <p>3.2.2: <i>Anopheles</i> (Female): Malaria</p> <p>3.2.3: <i>Culex</i> (Female): <i>Filaria</i></p> <p>3.2.4: <i>Aedes</i>: Dengue, Zika virus infection</p> <p>3.2.5: National Filarial Control Programme (NFCP)</p> <p>3.2.6: National Malarial Eradication Programme (NMEP)</p>	
--	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--

GROUP - B		
4	<p>4. Human disease caused by viruses & bacteria: Causative agents & pathogenicity</p> <p>4.1 Diseases caused by Viruses</p> <p>4.1.1 Contagious and respiratory Air borne viral diseases: common cold and different types of flu, and CoVid</p> <p>4.1.2 Gastrointestinal and exanthematous (skin) viral diseases: Measles and Chicken Pox</p> <p>4.1.3 Hepatic viral diseases: Hepatitis</p> <p>4.1.4 Hemorrhagic viral Diseases: Yellow fever and Dengue fever</p> <p>4.1.5 Neurologic viral diseases: Polio</p> <p>4.1.6 Auto immune diseases: AIDS</p> <p>4.2 Diseases caused by bacteria</p> <p>4.2.1 Air borne bacterial diseases: Tuberculosis and Diphtheria</p> <p>4.2.2 Food and water borne bacterial diseases: Botulism, Cholera and Typhoid.</p> <p>4.3 Eradication Programme for Polio- Pulse Polio.</p> <p>4.4 National AIDS control Programme.</p>	10

S. No.	Topic	Contact Hour
GROUP - A		
1	Biomembrane 1.1 Molecular organization, Fluid-Mosaic model 1.2 Transport across the cell membrane	07
2	Nucleus - Structure of Nuclear membrane and nuclear transport	05
3	. . Protein Trafficking: 3.1 Protein synthesis on free and bound polysomes 3.2 Uptake into ER 3.3 Membrane proteins 3.4 Golgi sorting 3.5 Post translational modification	06
4	Cell Signalling: 4.1. Intracellular receptors 4.2. Cell surface receptors 4.2.1. Ion channel linked receptors 4.2.2. G-Protein linked receptors	06

	4.2.3. Enzyme linked receptors 4.3 Signal transduction pathway	
5	Cytoskeleton- Structure and function 5.1. Microfilaments 5.2. Intermediate filaments 5.3. Microtubules 5.4. Intracellular transport-role of kinesin and dynein	04
6	Cell cycle: 6.1. Cyclins and 6.2. CDK Regulation 6.3. Checkpoints	02
7	Programmed cell death (Apoptosis).	01
8	Biology of Chromosome-Ultra structure of Chromatin fibre	04
9	Telomere and its maintenance.	02
10	Cell and its society 10.1 Cell junction and Focal adhesion 10.2 Cell-Cell adhesion	03

GROUP - B		
11	Gene mapping methods – linkage maps, mapping with molecular markers RFLP	04
12	Extra chromosomal inheritance: 12.1. Inheritance of mitochondrial and chloroplast gene	02
13	Recombination, site-specific recombination	02
14	4. Sex determination in <i>Drosophila</i> and Human 14.1 Role of alternate splicing 14.2 Role of SRY gene 14.3 SXL – gene	01
15	DNA library	01

	15.1 c- DNA library 15.2 Genomic library	
16	Reverse genetics: Antisense RNA	01
17	Transposons / Mobile genetic element 7.1 Transposable elements in Bacteria 7.2 Transposable elements in Eukaryotes 7.3 Transposable elements in Human	03
18	Gene regulation 18.1 Regulation of Prokaryotic gene expression 18.1.1 Inducible and Repressible gene expression 18.1.2 Positive and negative control of gene expression 18.1.3. Lac operon 18.1.3.1. Induction 18.1.3.2.Catabolic repressor 18.1.3.3.Use of IPTG 18.1.4. Trp operon Repression Attenuation	03
19	Genetics of cancer	03

PAPER – ZOO – S – 312	Practical	F.M=100 (Extn.70 + Int.30)
------------------------------	------------------	-----------------------------------

Practicals	Marks Distribution
1. Environmental Biology	20
2. Cell Biology	15
3. Genetics	15
4. Class Records, Poster/ Models	10
5. Viva- Voce	10

Total = 70 Marks

List of Practical

1. Environmental Biology

1. Study of adaptation in: Aquatic Insects, Fresh water fish, higher vertebrates
2. Identification of some common plankton
3. Water analysis for – Dissolved oxygen, Free Carbon dioxide, Total alkalinity and chloride in water.
4. Determination of population structure by quadrat method.
5. Estimation of Biodiversity indices.
6. Preparation of ppm solution

2. Cell Biology

1. Preparation of mitotic chromosomes from onion root tip
2. Preparation of meiotic chromosome from Testis of Grasshopper
3. Preparation of Polytene chromosomes from *Drosophila* chironomous.
4. Staining of Mitochondrial from human cheek epithelial cells.
5. Demonstration of Barr body in cheek epithelial cells/ hair follicle.

3. Genetics

1. Proof of Mendelian ratio of law of inheritance using pea seed samples
2. Determination of gene mapping.
3. Study of *Drosophila* mutant.

SEMESTER – IV
Discipline Centric Elective: Fish and Fisheries

(Credit – 05, Lectures – 60, Tutorials - 15)

PAPER – ZOO – E – 415A	Fish & Fisheries (Practical)based on ZOO E 413A & 414A	F.M=100 (Extn.70 + Int.30)
-------------------------------	-------------------------------------------------------------------------------	-----------------------------------

Practicals	Marks Distribution
1. Major Dissection (Bony fish)	10
1.1.Afferent branchial arteries	
1.2.Efferent branchial arteries	
1.3.Cranial nerves	
2. Minor dissection	05
2.1.Weberian apparatus	
2.2.Accessory respiratory organ	
2.3. Pituitary gland	
2.4. Gonads	
3. Mounting	05
3.1.Scales	
3.2.fish fry	
3.3.fingerlings	
4. Identification of two local fresh fishes with morphometric measurements up to species.	10
5. Spotting	20
5.1. Bones	03
5.2. Histological slides	03
5.3. Net and Crafts	02
5.4.Adaptive features	02
6. Class record	10
7. Viva-voce	10
	TOTAL - 70

SEMESTER IV

Discipline Centric Elective: Molecular Biology

PAPER-ZOO-E- 415B	Practical based on ZOO E 413B & 414B	F.M=100(Extn.70+Int.30)
------------------------------	-----------------------------------------------------	--------------------------------

Time: 6 Hours

Full Marks: 70

1. Quantitative analysis of Protein/ DNA	12
2. Isolation and determination of size of DNA by AGE	12
3 Isolation of plasmid from bacteria	12
4. Spotting	2 x 6=12
5. Models /Charts/Sessional work	06
6. Practical records	06
7. Viva-voce	10

TOTAL - 70

List of suggested practical's:

- 1. Quantitative analysis of DNA.**
- 2. Spectral analysis of Proteins.**
- 3. Isolation of genomic DNA from plants / animals / microorganisms.**
- 4. Separation of DNA by Agarose Gel Electrophoresis**
- 5. Determination of molecular weight and quantification of DNA using AGE.**
- 6. Isolation of plasmid and determination of purity.**
- 7. Estimation of RNA from sample.**
- 8. Restriction digestion of genomic DNA from plants/ animal tissue/ microorganisms.**
- 9. Agarose gel electrophoresis of restriction fragment.**
- 10. PCR amplification of DNA.**
- 11. Extraction of total RNA from Plant tissue /animals/micro organisms**
- 12. Separation of RNA through AGE.**
- 13 For spotting- Instruments used in Molecular Biology, Photographs of Gel, Plasmid etc.**

SEMESTER – IV

Discipline Centric Elective: Entomology
(Credit – 05, Lectures – 60, Tutorials - 15)

PAPER – ZOO – E – 415C	Practical based on ZOO E 413C &414C	F.M=100 (Extn.70 + Int.30)
------------------------	----------------------------------------	----------------------------

Practicals	Marks
Distribution	
1. Minor dissections and Temporary mounting	10
2. Major dissections	10
3. Spotting	
a. Permanent slides: Mouth parts of male & female mosquito(Anopheles)	
b. genitalia	
c. respiratory organs	
d. wings: Scales & whole mounts of wings of Dipteral & Hymenoptera	
e. endocrine organs	
4. Spotting of pests & Parasites	
a. Predators/ Venomous Insects	
b. Beneficial insects	
c. Insect Catching Devices	6x2.5=15
5. Study of common equipments used in insect control programmes	05
6. Taxonomic identification - Spotting (5 marks x2)	10
7. Records and Sessional work	10
8. Viva voce	10
Total = 70	

List of Practicals

1. Major Dissection:
General anatomy and nervous system of Cockroach, Honey bee Grasshopper
2. Minor Dissection and temporary mounting:
 - a) Tentorium of Cockroach,
 - b) Arista and Haltere of House fly,
 - c) Tympanum of Grasshopper,
 - d) Spiracle of Grasshopper / Cockroach,
 - e) Sting apparatus and Pollen basket of Honeybee,
 - f) Scales of Butterfly/ Moth,
 - g) Antennae of Termite & Coleoptera
3. Taxonomic description and identification of various insects belonging to the order: Phasmida, Isoptera, Dictyoptera, Hemiptera, Hymenoptera, Coleoptera.
4. Study of permanent slides: Whole mount of mouth parts, antenna, wings, legs, and genitalia
5. Histological slides of Digestive, Excretory, Reproductive, and Endocrine organs

6. Study of pests:

- a) **Stored grains,**
- b) **Paddy,**
- c) **Wheat,**
- d) **Sugarcane,**
- e) **Termites,**

SEMESTER – IV
Dissertation
(Credit – 05, Lectures – 60, Tutorials - 15)

PAPER – ZOO – E – 416 A* /B*/C*	Dissertation	F.M=100 (Extn.70 + Int.30)
-------------------------------------------	---------------------	-----------------------------------

- ❖ **Mid-Semester/Internal Assessment Examination = 30 marks**
- ❖ **End Semester Examination: Project model (if any) and the Project record notebook, Project presentation and viva-voce = 70 marks**
(Jointly conducted by One External & One Internal Examiners)

Overall project dissertation will be evaluated under the following heads:

- Motivation for the choice of topic
- Project dissertation design
- Methodology and Content depth
- Results and Discussion
- Future Scope & References
- Participation in Internship programme with reputed organization
- Application of Research technique in Data collection
- Report Presentation
- Presentation style
- Viva-voce

Note:

- (a) Each student must submit two copies of the dissertation work duly forwarded by the Head of the Department and duly signed by the supervisor concerned. The forwarded copies will be submitted to the concerned Department of University, for evaluation.

The paper will consist of

- Field work/Lab work related to the project
- Preparation of dissertation based on the work undertaken.
- Presentation of project works in the seminar on the assigned topic & open viva there on.

- (b) Each student shall have to complete a project work on a topic allotted by his/her Project Guide/Supervisor/Department in Semester -IV. This is compulsory and the candidates shall ensure that his project is on a relevant topic completed by him

independently with the help and inputs from his/her guide/supervisor. Other guidelines pertaining to this paper shall be provided by the Department.

(c) Student alone or in a group of not more than five, shall undertake one Project approved by the Subject Teacher/H.O.D. of the Department/College concerned. The progress of the Project shall be monitored by the faculty members at regular intervals.

(d) Students will select topics for the project work in consultation with a teacher of the Department. The Seminar will be held in the concerned Department of University.

The Dissertation/Project shall be presented with the following specifications:

(a) **Size of Paper:** A4. Dissertation/Project must be printed on one side of the paper.

(b) **Font Type:** Times New Roman.

(c) **Font Size:** Font size for English text is 12pt.

(d) **Font of Chapter Headings and Sub-Headings:**

- Chapter headings may be written in all Capitals, bold text in font size 14
- Sub-headings are written with left margin alignment
- First level sub-headings are written in normal sentence case using bold text in point size 14

• Second level sub-headings are point size 13

(e) **Spacing and Paragraphing:**

- Printing shall be in standardised form with 1.5 line spacing
- Leave as triple spacing (2 empty lines) in base font size 12 before and after subheadings and one empty line after all sub-headings
- Use one empty line between left-justified paragraphs

(f) **Margin:** Left margin should be 4cm and right, top and bottom margin should be 2cm. No ornamental bordering of sides is permitted.

(g) **Page Numbering:** Preliminary pages of the Dissertation/Project, i.e. those preceding in text are to be numbered in Roman numbered. Text should be numbered in Arabic beginning with Page No 1 on the first page of chapter 1

(h) **Preliminary sections of the Dissertation/Project** should include, Declaration of Attendance, Certificate from Supervisor, Declaration by Candidate and Supervisor regarding Plagiarism, Acknowledgement, Table of Contents, List of Tables, List of Figures/Diagrams, List of Abbreviations (if any) and an Abstract of the Dissertation/Project.

(i) **Referencing and Citation Style:** Citation i.e. a way of giving credit to individuals for their creative and intellectual works that you utilised to

support your research, differs by faculty in the style of ordering, punctuating and formatting of name, date, page, work etc. The referencing of work and Citation style in the Dissertation/Project submitted in Faculty of Science (Zoology) will be in **American Psychological Association (APA)** style (6th edition).

A* - Fish and Fisheries

B* - Molecular Biology

C* - Entomology
